

Visit Jujin

Posted on May 20, 2026

Last March we were visited by [Mr. Jae Hyung Kim](#) from our partner in Korea [JUJIN TECHNOLOGY Co. Ltd.](#) together with one of the engineers of the company. The purpose of the visit was to perform the FAT testing of our RANK ORC® equipment that will be shortly sent for commissioning and to discuss the future development of our common business in the Korean market in particular and Asian market in general.

The team has successfully passed the FAT tests and the foundations for future cooperation have been laid. Excited about what lies ahead in such an interesting and technological market as the Korean one.
