

Visit to the Sena

Posted on May 6, 2026

Last Friday, March 27, we received at our facilities a delegation from SENA (Servicio Nacional de Aprendizaje) of Colombia, who are conducting a survey of technologies that can be used to exploit geothermal resources. Very interesting discussions on the potential use of our ORC and HTHP technologies hybridized with Geothermal.

Many thanks to [Jorge Daniel Zipa Rodriguez](#), [Geny Astrid Leon Currea](#), [Giovanni Agudelo Fique](#), [Edgar Alfonso Navas Rojas](#), [Jorge Manuel Ardila](#) for their visit.
